Contents Volume 142

1 Dynamic multi-objective heating optimization
R.P. Hämäläinen and J. Mäntysaari

16 Modeling undesirable factors in efficiency evaluation
L.M. Seiford and J. Zhu

21 A geometric process equivalent model for a multistate degenerative system
Y. Lam, Y.L. Zhang and Y.H. Zheng

30 A solvable queueing network model for railway networks and its validation and applications for the Netherlands
T. Huisman, R.J. Boucherie and N.M. van Dijk

52 Single machine earliness–tardiness scheduling with resource-dependent release dates
J.A. Ventura, D. Kim and F. Garriga

70 A GRASP heuristic for the mixed Chinese postman problem
A. Corberán, R. Martí and J.M. Sanchis

81 Improving supply-chain performance by sharing advance demand information
U.W. Thonemann

108 Exploiting structure in adaptive dynamic programming algorithms for a stochastic batch service problem
K.P. Papadaki and W.B. Powell

128 An optimization approach to plan for reusable software components
R.P. Sundarraj

138 Solving the multiple competitive facilities location problem
T. Drezner, Z. Drezner and S. Salhi

152 The development and evaluation of a fuzzy logic expert system for renal transplantation assignment: Is this a useful tool?
Y. Yuan, S. Feldhamer, A. Gafni, F. Fyfe and D. Ludwin

174 Evaluating the best main battle tank using fuzzy decision theory with linguistic criteria evaluation
C.-H. Cheng and Y. Lin

187 A decision support model for selecting product/service benefit positionings
A.M. Krieger and P.E. Green

203 Application of heuristic methods for conformance test selection
T. Csöndes, B. Kotnyek and J.Z. Szabó

219 Editorial: Graphs and Scheduling (ECCO XIII)
G. Improta and S. Martello

221 A penalty function heuristic for the resource constrained shortest path problem
P. Avella, M. Boccia and A. Sforza

231 Diversification strategies in local search for a nonbifurcated network loading problem
B. Gendron, J.-Y. Potvin and P. Soriano

242 An approximation algorithm for scheduling trees of malleable tasks
R. Lepère, G. Mounié and D. Trystram
250 An Ant Colony Optimization algorithm to solve a 2-machine bicriteria flowshop scheduling problem
V. T'kindt, N. Monmarché, F. Tercinet and D. Laügt
258 Combination between global and local methods for solving an optimization problem over the efficient set
H.A. Le Thi, D.T. Pham and N.V. Thoai
271 Tabu search for single machine scheduling with distinct due windows and weighted earliness/tardiness penalties
G. Wan and B.P.-C. Yen
282 Two models for a family of flowshop sequencing problems
E.F. Stafford Jr. and F.T. Tseng
294 Reducing passenger boarding time in airplanes: A simulation based approach
H. Van Landeghem and A. Beuselinck
309 A note on minimum makespan assembly plans
G. Gallo and M.G. Scutellà
321 The impact of forecasting model selection on the value of information sharing in a supply chain
X. Zhao, J. Xie and J. Leung
345 Locating a waste treatment facility by using stochastic multicriteria acceptability analysis with ordinal criteria
R. Lahdelma, P. Salminen and J. Hokkanen
357 A visual interactive tolerance approach to sensitivity analysis in MOLP
A.R. Pereira Borges and C. Henggeler Antunes
382 Using neural networks for identifying organizational improvement strategies
R. Montagno, R.S. Sexton and B.N. Smith
396 Performance analysis and optimization of web proxy servers and mirror sites
N. Gautam
419 Optimisation modelling of industrial energy systems using MIND introducing the effect of material storage
M. Heidari Tari and M. Söderström
435 Review of properties of different precedence graphs for scheduling problems
J. Blazewicz and D. Kobler
444 On generalized semi-infinite optimization and bilevel optimization
O. Stein and G. Still
463 On the core of semi-infinite transportation games with divisible goods
J. Sánchez-Soriano, N. Llorca, S. Tijs and J. Timmer
476 Output–input ratio analysis and DEA frontier
Y. Chen and A.I. Ali
480 Infrastructure development for conversion to environmentally friendly fuel
R. Bapna, L.S. Thakur and S.K. Nair
497 Quality improvement and setup reduction in the joint economic lot size model
J.F. Affisco, M.J. Paknejad and F. Nasri
509 An integrated approach for planning the adoption of client/server systems
A. Amiri
523 Commonality and postponement in multistage assembly systems
S. Ma, W. Wang and L. Liu
539 Joint reliability importance of k-out-of-n systems
J.S. Hong, H.Y. Koo and C.H. Lie

548 A preventive maintenance policy with sequential checking procedure for a Markov deteriorating system
S. Bloch-Mercier
577 A recursive method for the *N* policy G/M/1 queueing system with finite capacity
J.-C. Ke and K.-H. Wang
595 Non-uniform random variate generation by the vertical strip method
W.K. Pang, Z.H. Yang, S.H. Hou and P.K. Leung
610 Confrontations in health service management: Insights from drama theory
J.W. Bryant
625 Three-person multi-objective conflict decision in reservoir flood control
C. Chuntian and K.W. Chau
632 The stock market's reaction to quality certification: Empirical evidence from Spain
J.L. Nicolau and R. Sellers
642 Measuring equity of educational outcomes in the presence of inefficiency
J. Ruggiero, J. Miner and L. Blanchard
